Dominic Seung

Irvine, CA • San Ramon, CA
dominic@seung.dev | (925)-967-1744
LinkedIn | GitHub | Portfolio

Full-stack software developer proficient in React/React Native and computer science student at UC Irvine.

Education

Bachelor of Science in Computer Science
University of California, Irvine
Expected Graduation: June 2029

High School Diploma
Dougherty Valley High School
San Ramon, CA
2021-2025

Certifications

AWS Certified Cloud Practitioner
(Amazon Web Services) | Verification Link

Issued August 2026 · Expires August 2029

Experience

Information and Computer Science Student Council
Projects Committee
GitHub | Website
2025–Present

- Facilitated development of AntAlmanac (16,000 MAU), a schedule planner for UC Irvine.
- Built CI/CD through GitHub workflows, DevOps tools for creating and migrating developer environments.

Projects

Scheduli – School Schedule Website and Mobile App

Scheduli | GitHub
Developed in High School (2023–2025)

- Created a cross-platform app to manage complex school schedules, ensuring reliability during chaotic periods; available on web, Android, and iOS.
- Implemented features including customizable routines, real-time widgets, and progress notifications
- Web version built with Next.js, React, and Tailwind CSS. Mobile app created using React Native, Expo, and Swift widgets for iOS.

Kubernetes Homelab
GitHub
2026–Present

- Created and maintained a Kubernetes cluster using Talos, ArgoCD, Helm charts, and kube-vip for load balancing and virtual IPs.
- Uses GitOps with ArgoCD to automate deployemnts
- Built on-premise with a mix of Proxmox VMs, UTM VMs, and a backup running on AWS for uptime checks and redundancy.

BetterHUD – Minecraft Fabric Mod
Modrinth | GitHub
2024–Present

- Developed a Minecraft mod in Java for Minecraft Fabric
- Achieved 13,000+ downloads on Modrinth, a Minecraft mod distribution platform.

Open Source Contributions

Plannter – College Planner App
Plannter | GitHub | Pull Request

- Collaborated with a friend to make Plannter, a high school and college course tracker.
- Created with Next.js/React and involved collaborative development.

Schoology Plus – Chrome Extension (200,000+ Users)
Pull Request #292 | Pull Request #298 | Pull Request #326 | Pull Request #328

- Contributed to Schoology Plus, an open-source browser extension designed to add features to Schoology LMS.
- Provided bug fixes, style improvements, and enhancements to the What-If grade feature.

Skills

- Programming Languages: JavaScript/Typescript, HTML/CSS, Python, and Java

- Frameworks & Libraries: React (with Tailwind CSS), React Native/Expo (with Nativewind), Next.js, Astro, and Svelte
- Tools & Technologies: Docker, Kubernetes, Proxmox, AWS, Git, Swift, Java, Linux
